

BRAND IDENTITY

Branding Package

The Papi Lotus identity system: visual world, artist persona, AI character bible, prompt language, Instagram direction, website style, and repeatable brand rules.

PAPI LOTUS

Dark R&B / afterhours pop / synthetic celebrity rollout

BRAND ESSENCE

What Papi Lotus is

Papi Lotus is a dark, romantic, afterhours artist identity built around cinematic isolation, seductive melancholy, and digital mythology. The brand should feel like a night drive you should not be taking.

Brand sentence: Papi Lotus is the sound of beautiful bad decisions after midnight.

Emotional territory: longing, temptation, detachment, obsession, regret, luxury, emptiness, and rebirth.

Creative archetype: the nocturnal antihero. He is not the loudest person in the room; he is the person the room is trying to decode.

The lotus meaning: rebirth through darkness. Beauty that grew out of the mud. That gives the name emotional depth beyond just sounding cool.

The Papi meaning: seductive, playful, familiar, charismatic. The contrast with Lotus keeps the name from feeling too cold.

Brand tension: soft name, dark world. That tension is the identity.

BRAND PILLARS

The rules that hold the world together

Everything Papi Lotus creates should come back to these four pillars.

Pillar	Meaning	How it appears
Nocturnal romance	Love, lust, regret, and longing after midnight.	Night drives, hotel rooms, rainy windows, empty streets, red lighting.
Luxury loneliness	Beautiful environments that still feel emotionally empty.	Chrome, black leather, dim penthouses, expensive-looking isolation.
Digital mythology	AI-enhanced artist presence that feels intentional, not fake.	Consistent AI character, synthetic paparazzi, cinematic fake archives.
Controlled mystery	Give enough feeling to pull people in, but do not explain everything.	Short captions, fragments, dates, cryptic visuals, minimal interviews.

Simple brand filter: if the asset does not feel like midnight, memory, desire, or disappearance, it probably does not belong in this era.

AUDIENCE

Who this is for

The audience is not just fans of one genre. It is people who use music as atmosphere for late-night feelings.

- Listeners who like dark R&B, alt-pop, trap-soul, moody vocals, and cinematic production.
- People who save lyrics because they feel personally attacked in a good way.
- Night-drive listeners, post-breakup scrollers, gym-at-night people, and emotionally complicated romantics.
- Fans who respond to visuals as much as songs: mood boards, reels, aesthetics, characters, and lore.

Audience desire: they want a song and a visual world that makes their private emotions look expensive.

Papi Lotus should not act desperate for attention. He should feel like something people discovered.

VISUAL IDENTITY

Color palette and atmosphere

The visual identity should be instantly recognizable: dark base, wine/red emotional center, chrome highlights, analog grain, and small amber accents.

Afterhours Black

Lotus Wine

Blood Neon

Chrome Mist

Old Gold

Bone Paper

#171417

#54162D

#B32047

#BFC5D2

#D59631

#F6F1EA

Use black/wine/red as the dominant palette. Chrome and bone should support readability. Amber should be used sparingly for premium accents, dates, dividers, or small symbols.

Element	Rule
Lighting	Low-key, red/wine practical lights, chrome-blue rim light, flash photography, rain reflections.
Texture	Film grain, VHS noise, lens bloom, dust, wet glass, motion blur.
Composition	Lots of negative space; subject often off-center; avoid busy backgrounds unless blurred.
Mood	Cinematic, seductive, detached, melancholic, expensive, a little dangerous.
Readability	Text must be high contrast. White/chrome text on black/red. Avoid thin red text on black.

TYPOGRAPHY

Font direction

Use type that feels premium and cinematic, not horror-movie cheap. Keep it clean and minimal.

Use	Direction	Notes
Logo / wordmark	High-contrast serif or sharp condensed sans	Should feel like a luxury nightlife label, not a rap mixtape font.
Headlines	Condensed bold sans	Use all caps sparingly for titles, dates, single names.
Body/captions	Clean sans	Readable first. Let the imagery carry the mood.
Lyric overlays	Small, spaced, minimal	One line per frame. Do not clutter.

Suggested font vibe: Neue Haas / Helvetica Now / Inter for clean body text, paired with a dramatic serif like Canela-style or a tall condensed sans for titles. If using Canva or web templates, prioritize clean readability over exotic type.

LOGO + MOTIFS

Symbols to build recognition

You do not need a complicated logo immediately. You need repeatable marks and motifs that make posts feel connected.

Motif	How to use it
Lotus mark	Minimal lotus icon as watermark, cover art symbol, website favicon, end card mark.
Red halo	Subtle red glow behind the face/body, especially in AI portraits and thumbnails.
Chrome cross / chain	Recurring jewelry motif; use only if authentic to your look.
3:17 AM timestamp	False archive marker for mysterious clips and Stories.
Wet glass	Rain/reflection motif for heartbreak and memory.
Static signal	Glitch/noise motif for comeback and digital mythology.

First logo direction: a clean PAPI LOTUS wordmark in white/chrome, with a small wine-red lotus symbol. Keep it simple enough to sit on cover art, video end cards, and the website.

ARTIST PERSONA

How Papi Lotus should appear

Your public persona can be mysterious without being fake. The key is controlled consistency.

Personality traits: calm, seductive, emotionally guarded, funny only in a dry way, reflective, cinematic, low-volume confidence.

Communication style: short sentences, fragments, late-night thoughts, minimal explanation, occasional vulnerable posts when it matters.

Do not over-share: the brand works better when people fill in the blanks.

Do not hide completely: you are using your face and body, so the mystery should come from styling, atmosphere, and selective presence - not faceless anonymity.

Say this	Not this
came back different.	Hey guys, sorry I haven't posted in forever, here is my new content strategy.
this one sat in the dark too long.	I made this music video a while ago and I need more engagement.
watch before it disappears.	Please watch my new video and share it everywhere.
lotus season.	New branding era campaign rollout beginning now.

AI CHARACTER BIBLE

Rules for your consistent Higgsfield character

Because you plan to upload your face/body for consistency, create a written character bible before generating assets. This prevents random outfits, random moods, and random versions of you.

Identity lock: the character is you, not a replacement artist. Use your face/body references, but keep the outputs in a controlled visual lane.

Reference photo set: use clear front, side, 3/4, full-body, neutral expression, and a few mood expressions. Avoid filters that distort your face. Use only images you have the right to use.

Consistency rules: same hair direction, same facial hair if applicable, same general build, same jewelry language, same color palette, same emotional expression range.

Expression range: tired eyes, neutral mouth, slight smirk, distant stare, downward gaze, rare direct eye contact.

Category	Default rule
Hair	Keep consistent across the era; avoid random drastic changes unless it is a planned version.
Wardrobe	Black layers, leather/denim, long coat, fitted tee, boots/sneakers, silver jewelry.
Poses	Standing alone, leaning against car/wall, walking away, looking through glass, seated in empty room.
Camera	35mm cinematic, flash paparazzi, handheld, low angle, over-the-shoulder, mirror shot.
Do not generate	Random fantasy armor, cartoon cyberpunk, overly bright streetwear, generic influencer luxury, big smile promo shots.

WARDROBE DIRECTION

How to fake expensive style without buying clothes

The AI wardrobe should look consistent, not overdesigned. Papi Lotus should look like he dressed for a night he regrets.

Look	Description	When to use
Afterhours uniform	Black fitted tee, black jacket, dark pants, silver chain, wet hair/soft shine.	Most posts; base identity.
Luxury decay	Long black coat, chrome jewelry, dim hotel/penthouse background.	Editorial portraits and cover art.
Motel noir	Open jacket, muted shirt, boots, rainy parking lot or hallway.	Video teasers and POV clips.
Studio ghost	Dark hoodie or jacket, headphones/mic shadows, red LED room.	Behind-the-era content.
Performance silhouette	All-black outfit, rim light, face partly shadowed.	Music video fragments and thumbnails.

Avoid over-luxury flexing unless it feels lonely or cinematic. The brand is not 'look how rich I am.' It is 'look how expensive this emptiness feels.'

IMAGE PROMPT LIBRARY

Copy/paste prompts for AI visuals

Use these as starter prompts and adjust location, lyric, and emotion. Keep the same character reference active.

Scene	Prompt
Rainy motel	Consistent Papi Lotus character standing outside a neon motel at 3 AM, black layered outfit, silver jewelry, wet pavement, wine-red neon, grainy flash photo, cinematic loneliness, 35mm film, high contrast, mysterious expression.
Paparazzi	Consistent Papi Lotus character caught by flash photography leaving an underground club, blurred background, chrome highlights, black coat, red light spill, luxury nightlife, analog grain, candid but stylish.
Empty penthouse	Consistent Papi Lotus character alone in a dark luxury apartment, city lights through rainy glass, black outfit, low red lamp, reflective surfaces, melancholy, cinematic editorial photo.
Studio red room	Consistent Papi Lotus character in a dim recording studio, red LED glow, microphone silhouette, smoke haze, tired eyes, premium dark R&B; mood, shallow depth of field.
Car window	Consistent Papi Lotus character seen through wet car window at night, reflections of city lights, distant stare, black leather jacket, chrome chain, film grain, emotional isolation.
Fake magazine	Papi Lotus dark music editorial cover, luxury noir layout, wine red and black palette, cinematic portrait, minimal typography, mysterious comeback feature, high fashion music magazine aesthetic.

VIDEO PROMPT LIBRARY

Short-form AI motion prompts

Use these with your music video seeds or still images to create motion without heavy editing.

Use	Prompt
Hook loop	Create a 9:16 cinematic loop from this clip. Keep the character identity consistent. Add rainy neon city reflections, slow handheld movement, wine-red lighting, film grain, subtle camera push, dark R&B; afterhours mood.
Lyric visual	Generate a slow-moving background for a lyric post: black room, red light flicker, smoke haze, wet glass, slight camera drift, luxury loneliness, no extra characters, leave negative space for text.
Paparazzi motion	Transform this clip into candid paparazzi footage, bright camera flashes, blurred nightclub exit, handheld shake, dark coat, chrome jewelry, cinematic but raw, 9:16.
Surveillance	Make this feel like late-night surveillance footage from an empty hotel hallway, subtle glitch, timestamp feel, red emergency light, lonely and mysterious, not horror.
Official teaser	Create a high-impact 8-second teaser with slow push-in, red bloom, analog grain, wet reflections, no extra text, designed for music video countdown.

INSTAGRAM SYSTEM

Grid, bio, highlights, and pinned posts

When someone lands on Instagram, they should understand the era immediately.

Recommended bio options:

- dark pop / afterhours R&B;
- transmissions from after midnight
- nocturnal romance.exe
- PAPI LOTUS - new transmission soon

Profile area	Recommendation
Profile photo	High-contrast AI portrait: face visible, dark background, red rim light. Avoid busy graphics.
Bio	One-line mood + release CTA. Keep it cryptic but understandable.
Link in bio	Use one landing page with listen/watch/follow links. Do not scatter attention.
Pinned post 1	Official video or strongest teaser.
Pinned post 2	Identity reset visual: Papi Lotus is back.
Pinned post 3	Best lyric/POV clip with strongest engagement.
Highlights	WATCH / SONGS / ARCHIVE / LOTUS / BTS.
Grid rhythm	Portrait, clip, lyric, clip, editorial, clip. Keep the colors consistent.

TIKTOK SYSTEM

How to return without dancing

Papi Lotus TikTok should not imitate influencer TikTok. It should use the platform's speed while keeping the brand's mystery.

Best TikTok formats for this brand:

- POV heartbreak clip: 7-12 seconds, first-person emotional caption, hook loop.
- Night-drive visualizer: road/city/rain footage with lyric overlay.
- Fake archive: 'Papi Lotus - footage recovered 03:17 AM.'
- Comment-to-content: reply to comments with a new AI background and the same hook.
- Which version poll: post two backgrounds and ask red room or rainy highway.

TikTok captions can be slightly more direct than Instagram, but still on-brand.

TikTok opener	Use case
POV: you miss the chaos, not the person.	Dark breakup/obsession clip
This part was sitting in my drive for too long.	Comeback authenticity
Do not send this to them.	Share/save prompt
Which scene matches the song?	Engagement test
I made a video for the version of me that disappeared.	Personal myth without overexplaining

WEBSITE BRAND DIRECTION

The Papi Lotus digital home

The website should feel like an experience, but it can still be simple enough for Codex to build quickly.

Site feel: black background, wine-red glow, sparse chrome text, slow background motion, no generic musician template.

Homepage hero copy options:

- PAPI LOTUS - transmissions from after midnight.
- The video was never supposed to stay hidden.
- Lotus season begins when the city sleeps.

Section	Design
Hero	Fullscreen dark video loop; wordmark; one CTA: Watch / Listen.
Release	Cover art, title, smart links, embedded video, one-line description.
Lyrics	Minimal lyric page with dark background and small type; good for SEO and fan saves.
Archive	Grid of visuals with dates and cryptic captions.
Email capture	'Join the afterhours list.' Keep fields minimal.

COPY VOICE

How the brand writes

The voice should sound like a late-night text you almost regret sending: short, loaded, and visual.

Voice trait	Do	Avoid
Minimal	Use short fragments.	Long influencer captions.
Cinematic	Mention rooms, rain, light, static, night, mirrors.	Generic 'new music out now' every post.
Seductive	Let the mood pull people in.	Overt thirst traps that cheapen the brand.
Vulnerable sometimes	Admit the song sat in the dark too long.	Trauma-dumping or overexplaining.
Confident	Use 'watch', 'listen', 'save this'.	Begging for engagement.

Caption tone examples:

- this one came from the part I do not talk about.
- save this for the drive home.
- the video is out. do not watch it sober emotionally.
- I should have deleted this song. I dropped it instead.

DO / DON'T

Brand guardrails

Use this every time you generate, edit, or schedule content.

Do	Don't
Use one color palette per era.	Jump between unrelated looks.
Keep text readable and minimal.	Use cluttered lyric graphics.
Make AI feel cinematic and intentional.	Use random AI outputs just because they look cool.
Repeat the same hook in different worlds.	Assume each post needs a new song section.
Show your face/body consistently.	Let the character morph into a different person.
Let mystery create curiosity.	Explain the strategy publicly.
Use human proof occasionally.	Make the entire artist presence feel fake or empty.

BRAND ASSET LIST

What to create first

This is the first production batch you should make before scheduling anything.

Asset	Quantity	Purpose
AI hero portraits	10	Profile photo, website hero, feed posts.
AI editorial/paparazzi stills	20	Feed, Stories, visual worldbuilding.
Video seed clips	10	Core short-form source material.
AI video variations	30	TikTok/Reels/Shorts.
Lyric overlays	15	Saves/shares and emotional attachment.
Cover art variants	3	Choose strongest thumbnail.
Logo/wordmark variants	3	Website, end card, social graphics.
Website visuals	5	Hero loop, release page, archive tiles.

Production order: character model first, then portraits, then music-video seed clips, then AI variations, then Postiz scheduling.

ERA NAMING

How to make releases feel like seasons

Each song should have an era name that guides the visuals. This makes your releases feel collectible instead of random.

Era name idea	Visual direction	Caption language
STATIC LOTUS	Glitch, red signal, VHS, hidden video recovered.	transmission / signal / recovered / archive
MOTEL SAINT	Neon motel, rain, sin, regret, hallway shots.	room key / do not knock / 3:17 AM
AFTERHOURS CONFESSION	Empty club, red lights, silhouettes, lonely luxury.	confess / disappear / last call
CHROME HEART ROT	Chrome, black leather, high contrast, toxic romance.	cold / shine / hollow / metal

FINAL BRAND CHECKLIST

Before you start creating

Use this as the simple go/no-go list.

- Papi Lotus bio updated and consistent.
- Profile image matches the dark red/chrome identity.
- One color palette chosen for this era.
- Higgsfield character trained or ready with clear reference photos.
- At least 30 AI stills generated before release week.
- At least 20 vertical clips generated before release week.
- One website landing page live or ready.
- DistroKid upload date and release date planned with enough lead time.
- Postiz has 2 weeks of content scheduled before the official drop.
- Pinned posts tell a stranger who Papi Lotus is within 5 seconds.

Brand mantra:

Papi Lotus is not posting content. Papi Lotus is sending signals from a world people want to enter.
